

# **Psyche - A Mission to a Metal World**

**By: Jonny Volpe**

**Peoples curiosity growing about  
Science calculating every doubt  
Young and old all should know  
Challenges met fast and slow  
Here we come Psyche here we go  
Everyone on board lets enjoy the show**

**A challenge is here we must not disappear**

**Mars will be needed gravity borrowed  
Instruments chosen a very full payload  
Symphonies of jet fuel burning in the air  
Sights never seen are waiting up there  
Infinite possibilities crying out for discovery  
Optical communications designed for recovery  
Never before seen data sitting in front of me**

**Time and sweat tears and fears  
Only hope carried us through the years**

**A challenge is here we must not disappear**

**Mission success no not yet  
Existing is one still important threat  
To analyze the data and what do we see  
Analysis done what has been waiting for me  
Let me know let me go hear my plea**

**We went and discovered what no one knew  
Only this couldn't have be done without you  
Results from the future we will have to wait  
Living in the present feeling all of the weight  
Dying to meet Psyche can't wait for the date**
